

DISCO LE CORBUSIER

*Cabaret Voltaire is pleased to present Disco Le Corbusier, a site specific project by **Daniel González** for the opening of Rizoma space in Bologna, during Arte Fiera 2010.*

After the surprising discovery of sketches and drawings by renowned architect Le Corbusier in the cellars of Unité d'Habitation in Marseille, Argentinean artist Daniel González opens a new road into the typological research on this eminent Swiss architect.

The contents of these unearthed drawings show Le Corbusier's startling and visionary intuition; a project that makes him the forerunner of the modern disco.

Like an archeologist of Le Corbusier's memory, Daniel González creates the archetype of an architectural fable as a place to live magical experiences. For the opening of Rizoma space in the historical centre of Bologna, the artist creates works in Mylar and audio-rhythmical lights that blend architecture with the social needs of the average man, pushing the boundaries of Modernism to a territory of thoughts, emotions and lightness.

Daniel González (born in Argentina, 1963) lives and works in Berlin. "I mold reality to create magic. I transform it using its own rules, changing the world one sequin at a time." Daniel Gonzalez's sequin banner-paintings and unique wearable pieces are presented in high-impact performances. They create delirious, sexy and energetic worlds: spaces of freedom where the existing conventions collapse. Daniel González had his first Italian solo show at Viafarini in 2006 and in 2008 he was invited to create a workshop-performance for Manifesta 7. Since 2007, he has worked with Italian artist Anna Galtarossa on public projects. They jointly presented "Chili Moon Town Tour" - a floating, traveling city, which opened on Lago Mayor of Bosque de Chapultepec in Mexico City – and "Homeless Rocket With Chandeliers" at Lambrate (Milan), a crane-installation in use in a building site for two years.
